- Easy to handle and extremely cost-efficient
- Connect via Centronics parallel and RS-232C serial, active port sensing
- Inking ribbon for printing up to 20 million characters

**Large selection
of fonts**

SEIKO Precision

Technical data

BX-900 – makes letter-quality a simple matter

The BX-900 from SEIKO Precision is **the** ideal solution when speed and letter-quality printing are required. Thanks to its high-performance print head, it can print up to 900 characters per second. And it features a particularly large number of fonts. Even Japanese characters can be printed without difficulty on the BX-900. The BX-900 is unbeatable when it comes to speed. Add to this the ease with which forms and originals with up to five carbon copies can be printed and the possibility of printing barcodes.

An excellent partner for everyday use

The BX-900 is a reliable partner in every respect. The exceptional service life of the ribbon (can print up to 20 million characters) and print head ensures that this needle printer can withstand even the most extreme de-

mands. Its special features make the BX-900 the ideal printer for all those users who have to print large volumes of forms or invoices quickly and economically without compromising on the quality of the printed image.

Print method	24-diamond-pin dot matrix impact (Ø 0,2 mm) bidirectional (text and graphics)
